

## Jonathan Zittrain: The Future of the Internet - and how to stop it

2008-06-12 07:26:59

Oxford- Professor Zittrain hat ein Buch über die Zukunft des Internet geschrieben, das sich mit der Architektur, auch der rechtlichen, des Internet auseinandersetzt. Die Reviews von eminenten Zeitzeugen sind beeindruckend:

This book is fundamental. It will define the debate about the future of the Internet, long after we haven't stopped it. Absolutely required reading."—**Lawrence Lessig, Professor, Stanford Law School, and author of Free Culture and The Future of Ideas**

"This remarkably researched and highly entertaining book is a must-read ... Zittrain's analysis is first-class and should be widely heeded by leaders from all sectors of society."—**Dr. Klaus Schwab, Executive Chairman and Founder of the World Economic Forum**

"The most compelling book ever written on why a transformative technology's trajectory threatens to stifle that technology's greatest promise for society. Zittrain offers convincing road maps for redeeming that promise."—**Laurence H. Tribe, Carl M. Loeb University Professor and Professor of Constitutional Law, Harvard Law School**

"Jonathan Zittrain does what no one has before—he eloquently and subtly pinpoints the magic that makes Wikipedia, and the Internet as a whole, work. The best way to save the Internet is to turn off your laptop until you've read this book."—**Jimbo Wales, Founder, Wikipedia**
